Re: Award of Contract for Grand Avenue Bioretention Basin
Project No. 74016

This project includes the installation of additional storm sewer in Grand Avenue and construction of a bioretention basin in Menomonee River Park on the east side of Grand Avenue near the intersection of Forest Drive. This area has experienced storm water problems due to poor drainage and sump pump discharges. The new storm sewer will help alleviate the poor drainage and standing water. The bioretention basin will capture and treat the stormwater runoff to provide better water quality before it discharges into the Menomonee River.

Bids for this project were received by the Village on October 5, 2017 with seven contractors submitting bids. A copy of the bid tabulation is attached for your reference. The low bid was submitted by Blaze Landscape Contracting, Inc. for a Total Base Bid of \$159,663.00. The Engineer's Estimate for this project was \$184,000.00.

The Engineering Department recommends Award of the Grand Avenue Bioretention Basin, Project No. 74016 to the low bidder, Blaze Landscape Contracting, Inc. in the amount of \$159,663.00.

FISCAL NOTE

Funding for this project was approved as part of the 2016 Capital Budget by the Village Board as part of the Grand Avenue Storm Sewer Replacement project. The Village also received \$123,000 in grant funding for this project from the Milwaukee Metropolitan Sewerage District (MMSD) under their Green Solutions program.
