RE: Diabetes Funding from Nueces County

The funds that were received from Nueces County for Diabetes Education were a true benefit to our district. With this financial support, the district was able to send school nurses to a conference for the Advances in School Nursing. The conference provided a wealth of information and support to our nurses and included education on Diabetes prevention and awareness, along with guidance and support of healthy lifestyles for those living with the disease.

We are requesting that funds be distributed to our district in the effort to continue to support Diabetes awareness for staff, students and community.

Sincerely,

Suzanne J. Nelson

Suzanne J. Nelson, Superintendent
