Elsa,

Attached are the three informal quotes for the Wastewater Improvements Project for LyondellBasell Park. Based on our phone conversation today, this item will be on the agenda at next commissioners court for approval.

Project scope consist of installing 745 linear feet of gravity wastewater line and the addition of three fiberglass manholes. The wastewater line will tie-in to the existing lift station and provide service to the existing concession stand that is right now being served by a septic system.

Please let me know if you need more information.

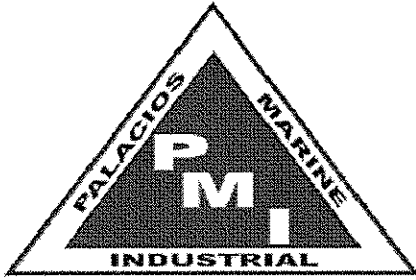

Thank You,

Juan A. Pimentel, P.E.
