County Board or Commission Information

Explain why you are interested in serving on this Board or Commission and what experience you bring that would assist in decision making and future actions of this Board or Commission.

I have been in healthcare since I started at the age of 16 as a college student. During my 41 year journey, I have encountered many patients with behavioral disorders and intellectual disabilities at various stages of my professional career. These were either as a result of genetic defects, birth trauma, physical trauma or environmental, situational or chemical etiologies. I have relatives and friends with relatives who have been affected directly or indirectly by someone with either or both. I believe that as a physician who is committed to his community's progress and development in all areas that this is one area where I can contribute, if given the opportunity.

I hereby certify that the foregoing answers are true. I further certify, should I be **considered for appointment** to a board, commission, advisory board or committee I will disclose in this application whether I am an employee of the governmental entity of which I seek appointment, I will disclose all appointments that may result in conflicting loyalties, and I will disclose if a family member is an employee of the governmental entity that I seek appointment. Also, should I be **appointed** to a board, commission, advisory board or committee, and should a conflict of interest exist or develop about a specific matter, I will disclose the conflict of interest upon discovery and recuse myself from the deliberations and action involved. Conflicts of interest include **but are not limited to**: a direct or indirect financial interest by me or a member of my family, and other interest, which impairs my ability to participate fairly in the deliberations and actions in question. ***I hereby affirm that I meet the minimum qualifications and residency requirements for this board or commission.**
