Commissioner Chesney,

At our previous Board of Park Commissioner's monthly meeting, I provided an update on the most recent discussion that have been had with the City of Corpus Christi regarding an interlocal with them to do beach maintenance, much like what we have with City of Port Aransas.

After much discussion, the Board took the position of promoting that we do a swap of areas of responsibility. This swap would consist of the City taking over maintenance responsibility for 7/10 of mile of beach we maintain at Newport Beach and the County taking over that same equivalent along the beach just South of Bob Hall that falls under City jurisdiction. This swap would not involve any compensation to either party. From an operational perspective this establishes greater efficiency making both the County and City more contiguous with their current areas of responsibility and eliminates years of "leap-frogging" that all parties have questioned.

The Board has also asked that I communicate that this is preferred approach, but they are open to other ideas and discussions.

Sincerely,

A handwritten signature in black ink, appearing to read "Scott Cross", is positioned below the word "Sincerely,".
