***EXPLANATION OF ZONE DESIGNATIONS**

ZONE	EXPLANATION
A	Area of 100-year flood; see flood elevations and flood hazard factors not determined.
A2	Area of 100-year shallow flooding where depths are between one (1) and three (3) feet; average depths are based upon one (1) year, but no flood hazard factors are determined.
AS	Area of 100-year shallow flooding where depths are between one (1) and three (3) feet; flood elevations are known, but no flood hazard factors are determined.
AS-ASB	Area of 100-year flood; see flood elevations and flood hazard factors determined.
ASB	Area of 100-year flood to be protected by flood protection; to-be-erect construction; see flood elevations and flood hazard factors not determined.
B	Area between 100th of the 100-year flood and 100-year flood; no depth data subject to 100-year flooding are average depths less than one (1) foot or where the combination of depth and velocity will not create any, or any produced by waves from the base flood, (storm surging).
C	Area of minimal flooding (no shading).
D	Area of undetermined, but possible, flood hazards.
V	Area of 100-year coastal flood with velocity (wave action); see flood elevations and flood hazard factors not determined.
V1/V2	Area of 100-year coastal flood with velocity (wave action); see flood elevations and flood hazard factors determined.

NOTES TO USER

Certain areas not in the special flood hazard zone (zones A and V) may be protected by flood control structures. See flood elevations and flood hazard factors not determined.

This map is for flood insurance purposes only; it does not show earth work or areas subject to flooding in the immediate or all placement features outside special flood hazard areas.
